GASTROSCOPY PREPARATION

Before the examination you need to stay fasting for at least eight (8) hours, without consuming any food. You can consume water until four (4) hours prior to the medical examination.
Before the 8 hour fasting, you can consume a light soup or broth.

Four (4) hours before the examination ,you cannot consume any water or any liquid.

If you are taking injections such as Ozempic, Mounjaro, etc., you must refrain from administering an injection for at least 1 week.

ON THE DAY OF THE EXAMINATION

- Do not drive any vehicle until at least 7-12 hours after the endoscopy.
- If you are on any medication such as anticoagulant medicines (eg. Salospir/ Plavix/ Sintrom/Pradaxa or other generic medicine), or anti-diabetic treatment (insulin or pills), you should contact your doctor and/or the department's endoscope, in order to interrupt or change the dosage.

Attention:
In case you should undergo a Colonoscopy at the same time, you should follow the instructions of the Colonoscopy Preparation
